

Understanding Your Electric Bill Can Save You Money

1-5 PEOPLE DO NOT UNDERSTAND THEIR ELECTRIC BILL

A recent survey done found that 1 in 5 Americans don't understand their electric bill. There are two parts of your bill, delivery and supply.

Delivery rates are fixed rates set by your local utility company. These rates cover the transportation of the electricity from where ever its generated to your business.

Supply charge refers to how much electricity you use and the rate each KWh costs.

How to lower your bill– contact ATIGROUP to review and offer suggestions on lowering your owning and operating costs for each of your sites.
